💼 Professional Experience

05/2022 – present
Istanbuk, Turkey

Full Stack Developer Intern, *Doğuş Teknoloji*
I worked in a department that aimed to develop technology for startups with a large team of interns. I was selected for a role in a combination of Team Leader and Scrum Master roles in a small team. We are working on an NFT Marketplace project. We started with React on the frontend, Solidity for smart contracts and .Net as the backend in this project. I'm taking more roles in the frontend.

10/2021 – 03/2022
Istanbul, Turkey

Full Stack Developer Intern, *Modanisa* 🔗
Complete intern roadmap which has full stack projects via using Vue.js and Go. This projects needs Acceptance Tests, unit tests and component tests in frontend and backend, Consumer Driven Contracts, CI/CD with Circle.CI and Google Cloud Platform. TDD approach in every development process.

🏠 Organisations

01/2021 – 02/2022
Istanbul, Turkey

FSMVU IAESTE, *Founder*
I was responsible for announcing and managing the necessary information for foreign inbound / outbound interns and FSMVU team members of the IAESTE Local community to improve.
